POTAIN 

Increasingly...

...closer to excellence...

40-metre jib

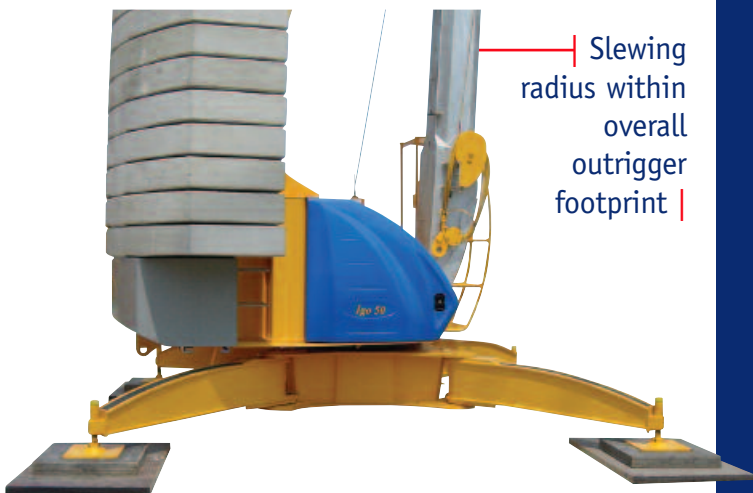

compact in transport

| Powerful |

Exceptional characteristics:

- 1100 kg at 40 m
- 4000 kg at 15.7 m
- Wide range of lifting speeds: from 1.8 m/min 4 falls to 66 m/min 2 falls
- New slewing mechanism **RVF+** allows reinforced braking by an opposite movement of the controls (counter-slewing)
- Several possible jib configurations:
 - Luffing jib at 8° or 20°
 - Jib folded or partially dismantled (e.g.: 2000 kg at 28 m)

| Compact |

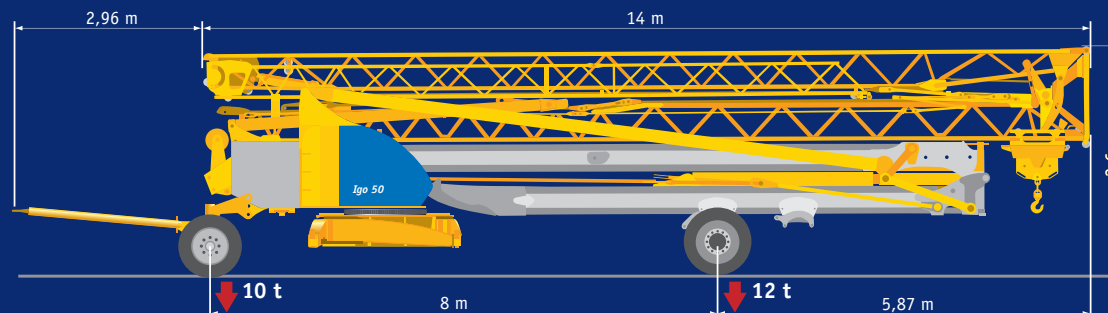

| Igo 50 |

Transport adapted to your needs:

- Crane very compact in transport (within the authorised volume of a standard low-loader):

- Ideal weight spread as a trailer or semi-trailer unit:

- Includes base ballast in the transport convoy
- Important ground clearance
- ▶ The 12 additional counterweights can be added with an optional hydraulic ballasting derrick.
